

# Science and Spirituality

## *Part III: What If It's All True?*

Saturday, May 5, 2012 - 1:00 PM - Johnson Hall  
Riverside Community Center for Spiritual Living

Fairmount Boulevard and Ridge Road, Riverside, CA  
Admission is free, a love offering will be taken

Dr. William Jury is profoundly expert discussing both the physical and the metaphysical. With a Master's Degree in Spiritual Psychology and a PhD in Physics, he is uniquely qualified to show where these two worlds meet, how they differ, and how they may ultimately be different aspects of each other.

We live in a world of competing ideas and beliefs – *what if it's all true? What would that mean for each of us?* Join Dr. William Jury, PhD., in a very open forum and workshop that will invite you to look both outward and inward, to examine the creation of the cosmos in the Big Bang, ponder the mysteries of Dark Energy, explore the bizarre world of the Quantum, and delve into the latest discoveries of Psi Ability. Through a series of in-depth exercises, you will have the opportunity to explore the implications of these findings for your personal belief system. Then together, we will posit the question: Rather than contradicting our spiritual beliefs, can the discoveries of science actually complement and reinforce them?

*The first two presentations in this series discussed a number of amazing findings and scientific theories dealing with both the origin and nature of the universe and the power of the human mind. It is not necessary to have heard the first two talks to participate in this workshop, as all of the relevant material will be reviewed.*
